The Division of Environmental Chemistry sponsors up to 25 annual awards to full-time graduate students currently enrolled in a United States educational institution in chemistry, environmental engineering or other programs emphasizing environmental chemistry. These students must have completed one full year of graduate study at their current institution by the date of announcement of the awards (January or February).

The award is based upon students' records in course work, evidence of research productivity and on statements from graduate faculty advisers. Primary emphasis will be given to the students' potential for future contributions as professionals in environmental chemistry. The application for the award is submitted by the graduate students' faculty advisor who may nominate only a single student. The student must be a member of the American Chemical Society and the student or advisor must be a member of the Division of Environmental Chemistry. Graduate students who receive the award will receive a one year membership in the Division of Environmental Chemistry and a cash award.
