

**DEADLINE EXTENSION:** Request for Information For White Paper

**This message is being sent on behalf of Michael Morello, Chair,  
Divisional Activities Committee (DAC)**

Dear Division Executive Committee Member:

In July 2013, the International Activities Committee (IAC) and the Divisional Activities Committee (DAC) of ACS conducted an online survey to learn about international activities conducted by Technical Divisions. From the survey, IAC and DAC obtained a general knowledge of the level of international engagement of Divisions, as well as some successful ventures.

Stimulated by responses from the survey, and in line with ACS's globalization outreach, the IAC and DAC formed a Working Group whose objective is to write a white paper that will provide guidelines on engaging in international activities. The white paper will be posted on the ACS website, accessible by all members, and will serve as a reference and resource material for Division members planning to engage in international activities.

Towards this effort, we would like to request a copy of your Division's international activities manual (if available). We would also appreciate it if you can send a list of past (starting with 2010) and present international activities your Division has/is engaged in. Copies of program, brochures, fliers or posters that were used in your activities will be very much appreciated.

Any specific issues or problems that you have encountered along with any solutions to issues also would be helpful, as this information will serve both the Divisions and ACS staff members in helping all divisions ensure successful programs internationally.

IAC/DAC has created a link in the ACS network where documents can be uploaded;  
<https://communities.acs.org/edit-place.jspx?containerType=700&containerID=2157>.

Please upload the files you wish to share before the link is closed on June 30.

Thank you for your cooperation.

Agnes Rimando  
ACS International Activities Committee working group contact

Rodney Bennett  
ACS Divisional Activities Committee working group contact
